CONTENTS

NO. 1 FEBRUARY 1989

A. GRÄSLUND AND B. JERNSTRÖM. DNA–carcinogen interaction: covalent DNA-adducts of benzo(a)pyrene 7,8-dihydrodiol 9,10-epoxides studied by biochemical and biophysical techniques 1

V. I. GOLDANSKII AND Y. F. KRUPYANSKII. Protein and protein-bound water dynamics studied by Rayleigh scattering of Mössbauer radiation (RSMR) 39

NO. 2 MAY 1989

X. GAO AND D. J. PATEL. Antitumour drug-DNA interactions: NMR studies of echinomycin and chromomycin complexes 93

M. F. PERUTZ. Mechanisms of cooperativity and allosteric regulation in proteins 139

NO. 3 AUGUST 1989

ALFRED R. HOLZWARTH. Applications of ultrafast laser spectroscopy for the study of biological systems 239

OLGA KENNARD AND WILLIAM N. HUNTER. Oligonucleotide structure: a decade of results from single crystal X-ray diffraction studies 327

NO. 4 NOVEMBER 1989

REINHARD SCHWEITZER-STENNER. Allosteric linkage-induced distortions of the prosthetic group in haem proteins as derived by the theoretical interpretation of the depolorization ratio in resonance Raman scattering 381
